DHANUSH K

Aspiring Software Engineer | B. Tech – Information Technology

+91 9361271851 | kddhanush851@gmail.com | LinkedIn | GitHub

EXECUTIVE SUMMARY

Final-year IT student passionate about real-world problem solving. Built projects using AI, IoT, and full-stack technologies. Skilled in Python, Java, Flutter. Quick learner with strong teamwork and project experience. Enjoys turning ideas into working solutions. Eager to grow with a tech-driven, innovative team.

EDUCATION

B. Tech – information technology — **CGPA: 8.22**
Mahendra engineering college, Namakkal. — Year: 2022 - present

HSC — **Percentage: 81.13%**
Govt. Boys higher secondary school, Kallakurichi. — Year:2020 - 2021

SSLC — **Percentage: 84%**
Govt. ADW high school, Niraimathi . — Year: 2018 - 2019

TECHNICAL SKILLS

- **Languages:** Java, Python, C, Dart
- **Web Technologies:** Html, CSS, JavaScript
- **Databases:** MySQL, MongoDB (Basic Proficiency)
- **Tools:** Vs Code, Figma, Ai Tools & Bots, Git, Saycheese (Cybersecurity)
- **Concepts:** Oops, Dsa, Machine Learning, Deep Learning, IoT & Embedded Systems, Cybersecurity

INTERNSHIPS

PulsePath application development (Puducherry Govt) — **10 Months**
Arou consultancy service — January - Present

Emergency ambulance routing system through Mobile app development using flutter

Full Stack Development Masterclass — **1 Month**
NoviTech R&D Pvt Ltd — April - May 2024

Gained practical experience in frontend, backend, and database development using full stack technologies.

Python + ML Foundations — **1 Month**
TNSDC – Naan Mudhalvan | STEP NITK & Pantech E-Learning — April 2023

Trained in Python, NumPy, Pandas, Seaborn, Matplotlib, and basic machine learning concepts.

Machine Learning & Deep Learning Internship — **5 Days**
Mar Baselios College of Engineering and Technology, Trivandrum — February 2023

Built a real-time face detection tool using Python, OpenCV, and Tkinter in a 4-member team.ss

PROJECTS

Movie genre prediction using posters |TensorFlow, keras, pandas, Matplotlib

Built a deep learning model using convolutional neural networks (CNN) to predict movie genres based on posters.

Status updater | Python, wi-fi, CNN

Created an android and desktop app to monitor customer queues and notify the shop owner when a customer approaches the billing desk.

Agriculture drone monitoring system (ongoing) | IoT, Raspberry pi zero 2w, CNN, wi-fi

An ai-powered drone system designed to monitor crop health, detect pests/diseases, and send real-time data for smart farming decisions.

Smart helmet for accident detection & reporting | Raspberry pi zero 2w, SW-420 sensor, Camera, wi-fi

Helmet system with impact detection, emergency alert, and real-time video logging for improved accident response and safety.

LinkedIn post generator (ongoing) | Dart, GitHub API, hugging face ai

A tool that uses artificial intelligence to generate professional LinkedIn posts based on GitHub repository content.

ACHIEVEMENTS

- Secured Second Prize in the Movie Genre Prediction using Posters event at Idaya Engineering College.
- Won Second Prize in the Status Updater competition at Government College of Engineering, Salem.
